multiple databases)**

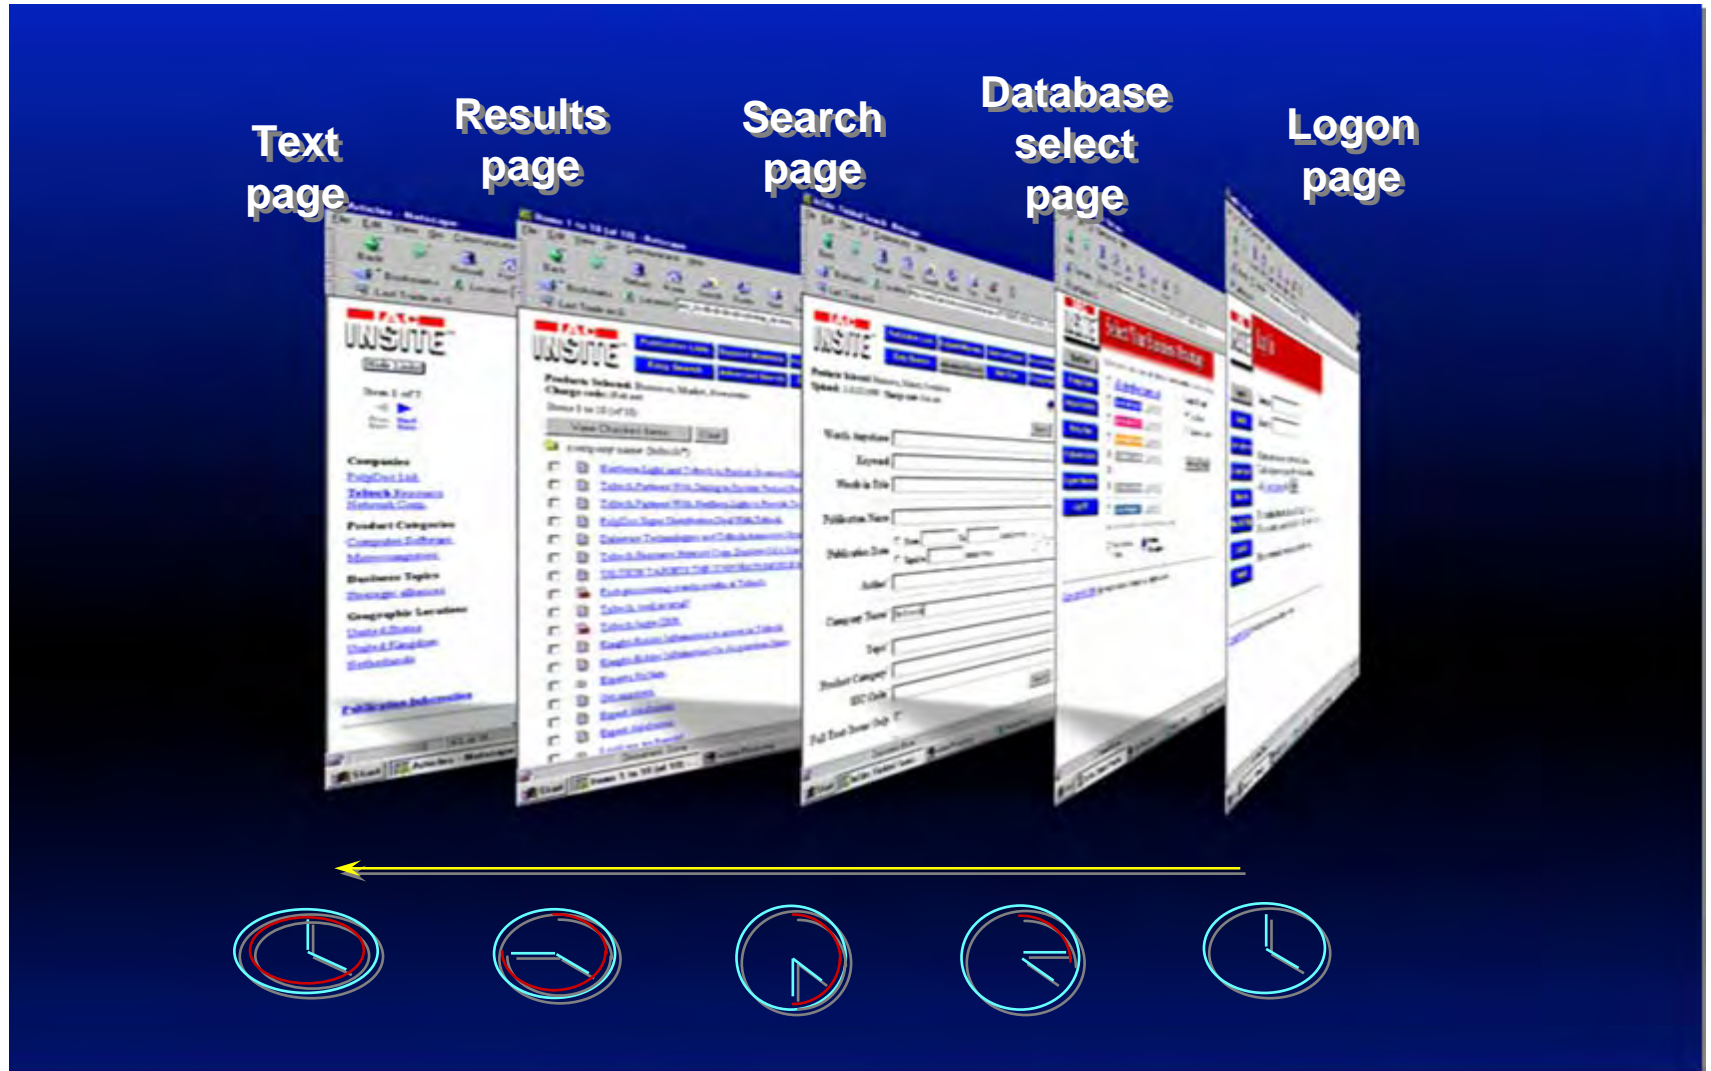

Accessing Individual Databases

The Problem

- Many sources, many interfaces, many strategies
- Extremely time-consuming
- Difficult to master

Typical online database: pages...

The Solution – Federated Search

- ☐ **Federated Search** can take one set of terms and look for them across many databases simultaneously.
- ☐ This makes searching easier and faster.
- ☐ A single search across all the databases
 - ☐ Quick Search in “Search Box”
 - ☐ Advanced Search by topic or by database
- ☐ Search results can be sorted
- ☐ Results are shown in the format of individual databases
- ☐ Most AZ Public Libraries have been set-up for access.

WebFeat Federated Searching

Statewide Access To Databases

- ❑ WebFeat Interface Federated Searching allows your users to simultaneously search any or all of your information sources from a single intuitive interface.

- ❑ Used by over 3,000 leading public, academic, government and 1000 libraries globally

Through their public libraries, Arizona residents may explore thousands of online articles and images from journals, newspapers, and current, accurate research materials.
